## PROJECTS

**HomeVista**                                            Live Demo | Client Side | Server Side

HomeVista, a role-based real estate platform for property listings, purchases and admin oversight.

- Implemented search and sorting features to enhance property discovery for users
- Implemented secure access control and role-based routing for a smooth and safe user experience
- Ensured responsive design for optimal user experience across devices
- Enabled agents to list properties and customers to purchase them through verified online payments

**MarathonMania**                                        Live Demo | Client Side | Server Side

A dynamic web application for creating and joining marathon events nationwide.

- Built a user-friendly interface with React.js and Tailwind CSS for seamless event navigation
- Developed backend APIs using Node.js and Express.js to manage event creation and registration
- Implemented secure routing and integrated JWT authentication to verify users, ensuring a safe and seamless experience across devices.

**HobbyHub**                                             Live Demo | Client Side | Server Side

A web platform for discovering, joining, and creating hobby-based groups

- Developed a responsive dashboard using React.js for tracking group activities
- Implemented RESTful APIs with Node.js and Express.js for group management
- Integrated MongoDB for efficient data storage and retrieval.
- Provided analytics for group creation and user engagement.
